New
New Grade KMG406

PVD coated K20-K30 ultra fine grain substrate
for affordable entry into high performance machining of steel,
cast materials and stainless steel.

YOUR BENEFITS

HPC Series

- Can be **used universally** for machining steel, cast material & stainless steel
- Greater **machining capacity** using optimised HPC geometry
- **Less vibration** due to variable pitch and variable helix angle

Tendo E compact

- **Greater process** reliability due to high clamping force (up to 2000Nm with Ø32mm)
- **Tool change within seconds** without peripheral equipment
- **Longer service life** due to optimal concentricity (< 0.03mm)
